Werner **Bisschoff**

Software Engineer

✉ wbisschoff13@gmail.com | ⌗ wbisschoff13 | in wbisschoff13

Dear Recruiting Manager,

About Me

I am a recent Computer and Electronic Engineering graduate from the North-West University. I am currently looking for a full-time or contract opportunity in the software development field.

I am currently based in Potchefstroom, but I am open to relocate anywhere in South Africa, or to work remotely or temporarily remotely. I am immediately available.

Why Me?

I am thorough and detailed in my work, and focus on getting the job done right. I enjoy software engineering, coming up with creative ways to solve new problems, and the challenges and learning opportunities that come with it.

I can work with many different technologies and am always eager to learn new technologies and adapt to the ever-changing software environment. I put in the effort to fill in any gaps in my knowledge. I try to understand the project at hand in close detail, as well as how it fits in to the bigger picture and interacts with other parts and systems.

I believe in good communication and respect in the workplace, as I realise that good teamwork and dedication are crucial to a highly functional working environment.

I have a good understanding of test-driven development and automated testing.

I believe that I could be a benefit to your company and work together with you to deliver the best.

Thank you for your time and consideration. I hope to hear from you soon.

Sincerely,

Werner Bisschoff
